DETAILED ACTION

This is the first Office Action for application number 10/735,441 Arrangement for Attaching a Hygienic Article, filed on 12/13/02. Claims 1-13 are pending.

Information Disclosure Statement

The information disclosure statement submitted on 12/7/04, 2/23/04 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Claim Objections

Claims 4-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another dependent claim. See MPEP § 608.01(n). Accordingly, the claim 4-13 not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3632

The claims were replete with unclear language. A few examples which are not intended to be an exhaustive list are listed below.

Claim 1 recites, "its full length". There is lack of antecedent basis for this limitation and further, it is unclear as to which element "its" may be referring.

Claim 2 recites, "its ends". There is lack of antecedent basis for this limitation and further, it is unclear as to which element "its" may be referring.

Claim 3 recites, "the wall-mounting rod". There is lack of antecedent basis for this limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by German Patent No. 81 30 060 (See IDS).

The German patent (81 030 060) discloses a wall-mounting rod (1) that has a continuous guiding profile for guiding a slide extending its full length, at least one bracket (14) inserted into the rod, for fastening the wall mounting rod to a wall near the end of the rod that leaves that part of the guiding profile clear.
